

Grazing and Cultural Burning field day

# Listening to the Landscape

Tools to improve land management skills

Tuesday 20 June 2023

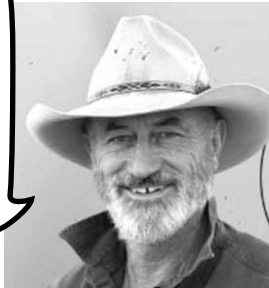

At Bibbaringa Bowna

(south of Holbrook)

The planet is inundated with ideas on how to manage different landscapes. This workshop aims to investigate the intricacies of observation and decision making to build a healthy regenerating environment.

**BOOK NOW!**

### Key note speakers

Dick Richardson [naturesequity.com.au](http://naturesequity.com.au)

Dick is known to challenge grazing practices and provide practical solutions and support that generate measurable ecological and profitable outcomes for farmers.

As a Holistic Management educator, his experience in Africa and Australia will encourage livestock producers into better on farm practices.

### Cultural Burning Discussion

Cultural burning aims to re-invigorate the health of the land. Fire may be used to benefit particular plants and animals, gain better access to Country, to clean up important pathways, and to maintain cultural responsibilities.

A cultural burning facilitator will attend the day to discuss these learning pathways to fire and land management.

Dr Sue Ogilvie [farmingforthefuture.org.au](http://farmingforthefuture.org.au)

Sue from Farming for the Future - a philanthropic foundation supported by the Macdoch Foundation.

It supports producers to evolve their farm businesses in ways that maintain and enhance the natural capital to build resilience and improve profitability.
