## The Art Workshop

This one day, intensive workshop is an opportunity to take stock of your practice and enhance your visual expression on many levels.

The morning session Joe will lead a group review to identify key visual and creative issues in each participant's work. The emphasis will be on recognising the potential and identifying the problems in the work.

The afternoon session students will commence a new work (or to re-work) in light of the review, supported by focussed, one-on-one discussion with Joe.

You will be invited to re-consider any habitual assumptions that are blocking your practice and given practical advice on how to begin subtly refining or thoroughly re-inventing your approach to form, materials and imagery.

### Please bring

1. 3 to 5 of your works (drawings / paintings / mixed media/ collages etc.) Either finished or unfinished, successful or not. Be prepared to have them discussed and possibly work on them again.
2. The materials used in your presented works and/or any other materials that you are currently working with, or that might enable you to further develop your work. If possible, bring drawing and painting materials (and appropriate boards/canvas/paper as per your preference) so that you can experiment freely.

The workshop will be held in the renovated Bibbaringa WoolShed on the SW slopes of Southern NSW, 45km north of Albury: [www.bibbaringa.com](http://www.bibbaringa.com)

Earth Canvas Inc. is a non for profit. It is about reconnecting people with Regenerating Farming landscape and using the eye of the artist to express what they see.

**Linking artists with Regenerative Farmers to  
create a better future**
